

LandGuard AI - Compliance Report

Generated: 2026-02-10 23:21 | CSIDC Industrial Plot Monitoring

1. Executive Summary

This report presents the automated compliance analysis of 10 industrial plots monitored by the LandGuard AI system. The analysis detected 8 violations across the monitored area, with an estimated financial impact of Rs. 2,650,000. Of the 10 plots analysed, 2 (20%) are fully compliant. The remaining 8 plots require immediate attention, with detailed findings below.

2. Violation Statistics

Severity	Count	Percentage
CRITICAL	5	62.5%
HIGH	0	0.0%
MEDIUM	0	0.0%
LOW	3	37.5%

Violation Type	Count
ENCROACHMENT	4
VACANT_PLOT	2
UNAUTHORIZED_CONSTRUCTION	1
BOUNDARY_DEVIATION	1

3. Detailed Violation Report

Plot ID	Violation	Severity	Area %	Overlap%	Action Required
P002	ENCROACHMENT	CRITICAL	44.0%	100.0%	Issue notice to plot holder; schedule field i
P003	VACANT_PLOT	LOW	0.0%	100.0%	Verify land-use status; consider reallocation
P004	ENCROACHMENT	CRITICAL	50.5%	100.0%	Issue notice to plot holder; schedule field i
P005	UNAUTHORIZED_CONSTRUCTIO	LOW	0.0%	100.0%	Halt construction; issue demolition notice
P006	ENCROACHMENT	CRITICAL	38.9%	100.0%	Issue notice to plot holder; schedule field i
P008	ENCROACHMENT	CRITICAL	41.2%	100.0%	Issue notice to plot holder; schedule field i
P009	VACANT_PLOT	LOW	0.0%	100.0%	Verify land-use status; consider reallocation
P010	BOUNDARY_DEVIATION	CRITICAL	1.2%	64.7%	Resurvey boundaries; issue correction notice

4. Recommendations

- Prioritize CRITICAL violations for immediate field inspection within 48 hours.
- Issue show-cause notices to all encroachment cases within 7 working days.
- Commission resurvey for plots with BOUNDARY_DEVIATION violations.
- Initiate reallocation process for confirmed VACANT_PLOT violations.
- Deploy continuous monitoring cycle (quarterly satellite imagery analysis).
- Establish automated alerting pipeline for real-time encroachment detection.

5. Cost-Benefit Analysis

Manual Survey Cost (drone + operator per plot): Rs. 25,000 x 10 = Rs. 250,000

Automated Analysis Cost (LandGuard AI): Rs. 50,000 (fixed)

Cost Savings per Cycle: Rs. 200,000 (80% reduction)

Annual Savings (4 cycles/year): Rs. 800,000

Additional benefits: Faster detection (hours vs weeks), consistent analysis, historical trend tracking, scalable to 1000+ plots.
